Welcome Messages from Presidents of the 7th EWPC

Dear colleagues and friends,

It is our great pleasure to welcome you to the 7th East-West Pain Conference (EWPC)!

The 1st EWPC was held in 1989, when the Chinese Association for the Study of Pain (CASP), the Chinese Chapter of the IASP, was inaugurated. The past two decades have witnessed tremendous progress in the

pain medicine in China. Most significantly, the Department of Pain Medicine was established in every major hospital to treat pain as a disease by itself; the “China Union of Pain Medicine (CUPM)” was formed, which includes members from anesthesiology, orthopedics, palliative cancer care and rehabilitation focused on

the common interest of providing the best care for patients suffering from chronic pain. The serial East-West Pain Conferences provided a unique platform for the exchange of ideas in science, technology and experience in serving pain patients among the experts coming from the East and the West, which have definitely helped to accelerate the progress of pain medicine.

In this 7th EWPC, a round table will be led by Dr. Michel Dubois, President of the American Board of Pain Medicine (ABPM), to discuss the impact of the newly established departments of pain medicine. Plenary lectures by world class pain experts will introduce and discuss state-of-the-art pain management for chronic headache, low back pain, visceral pain and many other chronic pain conditions. Dr. Nora Volkow, the director

of the National Institute on Drug Abuse (NIDA), NIH and Dr. Jon-Kar Zubieta, University of Michigan, will discuss the most advanced brain imaging techniques for research on pain and drug abuse, including acupuncture mechanisms. Symposia and poster sessions will provide exceptional opportunities for active discussions. This conference will facilitate and enhance interactions to realize our objectives “East meets West” and “bench meets bedside”.

The beginning of October is the best season in Beijing. The ancient Great Wall will be dressed with her autumn red leaves to welcome you as will the modern Olympic “Bird Nest” which is just outside of your window. You will experience an enthusiastically warm welcome by the friendly people of Beijing. We look forward to seeing all of you in Beijing.
